## Dosmatics are recommended for use with Chlorine to control Algae

- Adjust Dosmatic to 1 oz. per gallon
- Use standard liquid chlorine bleach
- Mix Chlorine solution using 1 oz. liquid bleach to 1 gallon soft water
- Test water with Chlorine test kit at last emitter on longest line
- For best results 2 to 3 PPM Chlorine is recommended
- Adjust Chlorine solution ratio until desired Chlorine level is obtained
- Chlorine levels will vary depending on water supply. Adjust solution as needed.

(1 tsp. Chlorine in 10 gallons of soft water = about 2 PPM free Chlorine)
